

FIND YOUR GREEN STATE OF MIND

WELCOME TO THE FIRST NEWSLETTER OF *THE GREEN STEP* PROJECT

The Green Step project aspires to adopt a holistic approach to support, raise awareness, and build capacity about environmental and climate-change challenges in the sphere of adult education.

The project consortium believes that adult education must be reoriented to help both adult educators and learners to develop knowledge, skills, values, and behaviours needed for addressing and bringing issues, such as climate change into teaching and learning.

WHAT'S IN THIS ISSUE:

- The project objectives
- First Transnational Partner Meeting
- The consortium partners

The Green Step aims to:

- Enhance awareness of the need for future-oriented curricula and methodologies for adult education that address the environmental challenges of today.
 - Experiment with new approaches to learning for sustainability.
 - Test innovative practices that will transform adult educators and learners to eco-conscious, true agents for change
 - Promote a flexible, local learning programme adapted to the learning needs of adults around the issues of environmental sustainability, climate change and behavioural (inner) transformation
 - Engage the wider adult education community, as well as local sustainability stakeholders (local learning centres, civil society, NGOs, public authorities, etc) to support learners' transition to greener economies and societies by equipping them with skills for green jobs and motivating them to adopt sustainable lifestyles

First Transnational Partner Meeting

The meeting started with a thorough update of project activities, such as the general project management and the supporting management activities, i.e., dissemination, quality assurance, impact assessment, branding identity, etc. Following that, the partners discussed the objectives and outcomes for Project Result 1, namely The Green Step Curriculum, which aims to support learners to understand and reflect on sustainability issues and how they could develop their competences in various sustainability-relevant sectors, as well as their green skills to advance their social and economic empowerment and inclusion

WHO GREEN STEP IS...

- STICHTING NETWERKPRO (NETHERLANDS)
- SYNTHESIS CENTER FOR RESEARCH AND EDUCATION (CYPRUS)
- GLOCAL FACTORY (ITALY)
- LAG NAPOCA POROLISSUM (ROMANIA)
- FO-AARHUS (DENMARK)
